

Notice of Completion of Draft EIR

PROJECT TITLE: North San Diego Water Reuse Coalition, Regional Recycled Water Project

PROJECT LOCATION: The NSDWRC's Regional Recycled Water Project is located within northern San Diego County, California and includes the collective service areas of the ten water and wastewater agencies that constitute the Coalition, as shown in **Figure 1**. The western boundary of the Study Area is defined by the Pacific Ocean; the northern boundary is roughly defined by Camp Pendleton and Rainbow Municipal Water District; the eastern boundary is the border with Valley Center Municipal Water District, the City of Poway, and the City of San Diego; and to the south, it is roughly bounded by the City of San Diego. Cities in Study Area include: Encinitas, Carlsbad, Escondido, Oceanside, Vista, San Marcos, and Solana Beach.

PROJECT DESCRIPTION: The Proposed Project would involve development of regional recycled water infrastructure to increase the capacity and connectivity of the recycled water storage and distribution systems of the Coalition members and maximize reuse of available wastewater supplies. The Proposed Project includes replacing potable water uses with recycled water components, converting facilities to recycled water service, connecting discrete recycled water systems to one another, increasing recycled water storage capacity, distributing recycled water to effectively meet recycled water demands, and implementing advanced water treatment to produce and use potable reuse water within the Study Area. The facilities included within the Proposed Project include construction of infrastructure and operations necessary to connect projected water reuse supplies with demands in a manner that maximizes beneficial reuse within the Study Area. This infrastructure includes pipelines, new and expanded treatment facilities, pumping stations, storage tanks, and other appurtenances. The Proposed Project would benefit customers and residents within the Study Area by increasing recycled water production and use, improving water supply reliability, and reducing treated wastewater discharges to the ocean.

LEAD AGENCY: Olivenhain Municipal Water District

DOCUMENT AVAILABILITY: The Draft EIR can be viewed on the North San Diego Water Reuse Coalition website or in print during regular business hours at Olivenhain Municipal Water District offices:
